

HEAVY DUTY ANCHORS

TruBolt™ Stud Anchors

The true to size heavy duty anchor

The TruBolt™ stud anchor is a true to size, torque controlled expansion anchor.

Product Advantages

- Load assisted through fixing
- Anti-rotation expansion sleeve
- Drill bit required is same diameter as anchor
- Expansion sleeve design ensures maximum expansion
- Fully assembled
- Maximum shear capacity for hole size as the stud diameter equals the hole diameter

Substrates

- Concrete
- Solid Brickwork

Typical Applications

- Structural beams and columns
- Wall to floor framework
- Steel to concrete
- Pallet racking and guards
- Lift rails
- Stadium seating
- Safety barriers

Specifications

TruBolt™ is a heavy duty, torque setting expansion anchor for permanent anchoring into solid substrates, such as concrete

Installation

1. Drill the correct diameter hole to the same diameter as the TruBolt™ stud anchor selected.
2. Remove debris from hole by blowing out with compressed air or hand held blow out pump.
3. Install the anchor in the hole with a hammer until washer seats on fixture.
4. Tighten bolt with a torque wrench to recommended assembly torque.

ANCHOR TECHNOLOGY

TruBolt™ Stud Anchors - Zinc Plated

Part No.	Description	Thread Ø	Max Fixture Thickness (mm)	Anchor / Hole Ø (mm)	Min Hole Depth (mm)	Order Qty
